and Capacity Development

---

**Resource Repository**

Relevant examples of resource materials that have been downloaded from various organisations and scientific journals. This section is organised by theme.

- General guidance documents
- Monitoring programme design
- Target values
- Groundwater monitoring
- Level 2 monitoring
  - Biological monitoring of freshwaters
  - Citizen science monitoring
  - Satellite-based Earth observation

---

**Online Support**

In response to feedback received following the first data drive, the online support available has been improved.

- Help desk
- Teleconference
- Regional Online Sessions
All general queries can be directed to SDG632@un.org (EN, FR, SP, RU, AR) are available upon request.
Bilateral teleconferences are available upon request.
Regional introductory sessions will be arranged to bring countries together based on a language basis.

Reports

Below are key reports completed following the first global data drive of 2017 and the most recent one of 2020.
