Resource Repository

Relevant examples of resource materials that have been downloaded from various organisations and scientific journals. This section is organised by theme.

- General guidance documents
- Monitoring programme design
- Target values
- Groundwater monitoring
- Level 2 monitoring
  - Biological monitoring of freshwaters
  - Citizen science monitoring
  - Satellite-based Earth observation

Online Support

In response to feedback received following the first data drive, the online support available has been improved.

Help desk  Teleconference  Regional Online Sessions
All general queries can be directed to SDG632@un.org (EN, FR, SP, RU, AR). Bilateral teleconferences are available upon request. Regional introductory sessions will be arranged to bring countries together based on a language basis.

Reports

Below are key reports completed following the first global data drive of 2017 and the most recent one of 2020.
